Miriyam kethana chowdary

kethanachowdary76@gmail.com +91 8712170955 Banglore, Karnataka

PROFILE

As a dedicated and forward-thinking engineering graduate with expertise in programming and data analysis. Driven to apply innovation and analytics to create meaningful impact.

PROFESSIONAL EXPERIENCE

Rooman Technologies, *Data analyst* 02/2025 – 05/2025 | banglore, karnataka

Completed a Data Analyst internship at Rooman Technologies. Performed data analyisis using Excel, SQL, and Python for analysis tasks. Contributed to projects involving student performance and training metrics. Created reports and dashboards to present data insights.

Motion cut, *intern* 10/2024 – 11/2024 | online

This internship focused on gaining practical experience in four projects: a portfolio website, an e-commerce product page, a to-do list application, and an online quiz platform Back-end development, front-end development Responsive web design.

TECHNICAL SKILLSS

- Languages: Java, Python, C, C++, HTML, CSS, JavaScript.
- Technologies: React, Node js.
- Configuration Management: Git, Github Actions.
- Databases/Operating Systems: MongoDB, MYSQL, MacOS, Linux, Windows.
- Additional Skills: Problem Solving, Debugging, Collaborative.

EDUCATION

NEW HORIZON COLLEGE OF ENGINEERING, 07/2025 | Banglore, karnataka
BACHELOR OF ENGINEERING IN CSE

NARAYANA COLLEGE, *PU* 05/2021 | Hyd, Telangana

PROJECTS

Teach Connect

Final-year project aimed at Al-based teacher-student portal using C and data-driven management concepts. Designed for efficient communication, database handling, and future Al integration.

HealthSphere (JavaScript, Java/Python, MySQL)

Built a personalized healthcare platform that analyzes genetic, lifestyle, and environmental data to provide tailored insights and health recommendations. Integrated backend APIs with a responsive UI, enabling seamless data visualization and user interaction.

Integrated Analytics (Unit Converter) (HTML, CSS, JavaScript, MongoDB)

Created a web-based tool for real-time unit conversions (temperature, distance, time, currency). Enhanced usability with responsive design and MongoDB integration for persistent storage of user preferences.

Shortest Distance Between Points (Python)

Engineered a Python-based route planner using graph algorithms (Dijkstra's Algorithm) to compute shortest paths between locations, simulating GPS navigation. Optimized execution for large datasets to ensure fast response times.

Books Management System

Developed an online book management platform using Java, MySQL, and OOPs principles. Integrated a RESTful API for smooth data transfer and enhanced the user experience through clean UI design.

CERTIFICATES

- IBM Innovation Design Technology Certificate
- Ethical Hacking Workshop Certificate by QuantumX workshop
- NPTEL certification for the course IOT

ACHIEVEMENTS

SIH (SMART INDIA HACKATHON), *Coordinator*

Volunteered for SIH (Smart India Hackathon), prestigious and large-scale hackathons held for 3 days.
